

Koninklijke Vlaamse Chemische Vereniging (KVCV vzw)

Invitation to support the Royal Flemish Chemical Society (KVCV)

Dear,

On behalf of the Board of the Royal Flemish Chemical Society, I extend a heartfelt invitation to you to support KVCV.

The Royal Flemish Chemical Society is a dynamic organisation that brings together individuals with a shared passion for science, particularly in the field of chemistry. Our diverse membership includes students, teachers, professors, laboratory technicians, process engineers, production managers, R&D managers, and consultants in both chemistry and life sciences. This diversity sets our organisation apart from traditional professional associations. The interdisciplinary nature of our society forms the basis for fruitful collaborations, including partnerships with *essencia* and all Flemish colleges and universities. Through the C2W | Mens & Molecule magazine, KVCV keeps its members informed about recent developments in chemistry and related fields.

KVCV is actively engaged in promoting chemistry, life sciences, and science in general through various activities and initiatives. We contribute to the popularisation of science for the general public, exemplified by our participation in events like the National Science Day. KVCV also develops educational materials for chemistry and science teachers and their students in secondary education. Additionally, we support the academic community and (Ph.D.) students through conferences, such as ChemCYS, lectures, and company visits. Professionals in the field can turn to KVCV for training and networking opportunities, as seen in events like the Kekulé Cycle. We believe that bringing together all stakeholders is crucial to maintaining and enhancing knowledge and prosperity in Flanders. Shaping the future talented workforce requires motivation and guidance today, for a scientific career in industry, academia, or education.

However, continuing our activities aimed at promoting the popularisation of chemistry and sciences, as well as those focused on the field of chemistry and life sciences, is not possible without your financial support. We sincerely appeal to your generous support. Attached, you will find details of the three formulas we offer for our supporting organisations. I warmly invite you to register through the web form (kvcv.be/support).

On behalf of the Board of KVCV, I would like to express my sincere gratitude for the trust you place in our society and for the attention you will give to this appeal.

Yours faithfully,

dr. Christophe De Bie

KVCV President
